PETROFAC ENSURES SAFETY OF MUSEUM'S CREW

Petrofac Training Services, the leading provider of competence-led training solutions to the international energy industries, has provided training in 'Personal Survival Techniques' to 14 volunteers from the Scottish Fisheries Museum Trust, saving the charity around £2,000.

The Scottish Fisheries Museum Trust's Boats Club both crews and maintains an old herring fishing vessel, the Reaper, which has been transformed into a mobile museum. The Reaper travels around the coast of Scotland and the North East of England stopping off to invite the public aboard to view and explore the museum and to learn about the history of the fishing industry.

The one-day Personal Survival Techniques training - also known as basic sea survival training - was undertaken at Petrofac's survival training facility in Aberdeen. The training has provided the Reaper crew members with the essential basic knowledge and experience of personal survival principles and techniques, including increased understanding of the safety procedures and compulsory equipment on board the vessel, all of which can be applied to maximise chances of survival in the event of an emergency at sea.

Jim Main, the Boats Club chairman, commented: "We are very grateful to Petrofac for their support and would like to thank them for providing this essential training. The crew found it to be an informative yet challenging experience. It concentrated the mind wonderfully and has provided us with a beneficial insight into the use of the safety equipment we have on board should we need to use it. Although we carry a liferaft on board we had never seen it inflated, let alone practiced using it."

Gordon Caird, regional director for Training Services' Europe operations, added: "We are delighted to support the Scottish Fisheries Museum Trust by ensuring they have the appropriate

training to continue their educational work around Scotland and the North East of England safely.”

Notes to Editors

Petrofac

Petrofac is a leading international provider of facilities solutions to the oil & gas production and processing industry, with a diverse customer portfolio including many of the world’s leading integrated, independent and national oil & gas companies. Petrofac is quoted on the London Stock Exchange (symbol: PFC) and is a constituent of the FTSE 100 Index.

The group delivers services through seven business units: Engineering & Construction, Engineering & Construction Ventures, Engineering Services, Offshore Engineering & Operations, Training, Production Solutions and Energy Developments.

Through these businesses Petrofac designs and builds oil & gas facilities; operates, maintains and manages facilities and trains personnel; enhances production; and, where it can leverage its service capability, develops and co-invests in upstream and infrastructure projects. Petrofac’s range of services meets its customers’ needs across the full life cycle of oil & gas assets.

With more than 11,000 employees, Petrofac operates out of five strategically located operational centres, in Aberdeen, Sharjah, Woking, Chennai and Mumbai and a further 19 offices worldwide. The predominant focus of Petrofac’s business is on the UK Continental Shelf (UKCS), the Middle East and Africa, the Commonwealth of Independent States (CIS) and the Asia Pacific region.

For additional information, please refer to the Petrofac website at www.petrofac.com.

Training Services

Training Services is one of seven business units that form the Petrofac group. As a leading provider of training solutions to the global oil & gas industry Training Services employs more than 450 highly experienced and competent personnel worldwide.

Headquartered in Aberdeen in the UK and Sharjah in the United Arab Emirates, our operations span three key regions across the globe including Europe and The Americas; Middle East, Africa and Central Asia; and Asia Pacific.

Our business is focused on providing specialist operations and technical training, safety related training and consultancy, emergency response and crisis management, and a range of managed solutions to our customers worldwide.

The collective reputation, experience and track record within Training Services provides a strong platform, which creates advantage for our customers by accelerating the efficiency and the safety of their operations.
